Abhishek Jangid

Applied AI Engineer & Systems Developer | Jaipur, India | abhishekjangid3489@gmail.com
Portfolio: abhishekkkk.in | GitHub: github.com/abhishekkkk-15 | LinkedIn: linkedin.com/in/abhishek-jangid-3532b1323

SUMMARY

Applied AI & Systems Engineer specializing in autonomous multi-agent systems, developer tooling, and distributed infrastructure. Proven track record building high-performance architectures with LangGraph, Go, TypeScript, and pgvector.

EXPERIENCE

Full Stack Developer -- Adiyogi Technosoft *2026 - Present*

- Architecting and shipping production full-stack web applications with Next.js, React, Node.js, and TypeScript.
- Engineering high-concurrency PostgreSQL and MongoDB data pipelines for real-time applications.

AI Systems & Distributed Infrastructure Engineer -- Autonomous Systems Lab / OSS *2024 - Present*

- Designed and deployed Jarvis Assistant, a multimodal AI companion using LangGraph state machines & Electron.
- Built Infra-CD, a self-hosted CI/CD engine in Go featuring runner daemons and real-time SSE log streaming.
- Engineered enterprise semantic search and RAG platforms using pgvector and hybrid re-ranking.

SELECTED PROJECTS

Jarvis Assistant v2.0 | TypeScript, LangGraph, Electron, Next.js *github.com/Abhishekkkk-15/jarvis-assistant*

- Multimodal desktop AI agent combining screen vision & microphone audio to automate system-level workflows.

Infra-CD v1.4 | Go, TypeScript, React, PostgreSQL, Docker *github.com/Abhishekkkk-15/infra-cd*

- Automated Git CI/CD system with lightweight Go execution workers and live streaming server-sent events.

Eden Workspace v1.1 | TypeScript, React, Node.js, pgvector, Redis, BullMQ *github.com/Abhishekkkk-15/Eden*

- Collaborative vector workspace enabling AI-driven team asset indexing and background queue pipelines.

CollabFlow v1.0 | TypeScript, NestJS, Next.js, PostgreSQL *github.com/Abhishekkkk-15/collabflow*

- Real-time collaborative project management engine with live state synchronization and role-based access control.

Internal Search v1.2 | TypeScript, Next.js, LangChain, OpenAI, pgvector *github.com/Abhishekkkk-15/internal-search*

- Unified RAG search platform querying across Slack, Notion, GitHub, and Jira using cosine similarity.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go (Golang), Rust, Python, SQL

AI & Vector Search: LangGraph, LangChain, RAG Pipelines, OpenAI API, pgvector Cosine Search

Frameworks & Backend: React, Next.js, Node.js, NestJS, Express, Gin, Tailwind CSS, Socket.IO

Infra & Databases: PostgreSQL, Redis, BullMQ, MongoDB, Docker, Linux Administration, CI/CD, Git
